

# **RASHIDA IQBAL FINANCIAL AID** **ORGANIZATION**

Guidelines for Embryology-Block 2, 2nd  
Year.

Recommended books: KLM and Langman.

## **Reproductive System:**

Read the whole text, mcqs and seqs, both are unpredictable so give a thorough read. Do clinicals

from both KLM and Langman. Most important things include:

- Features of Indifferent Gonads.
- Development of testes and ovaries.
- Abnormalities of uterine tubes, uterus and vagina.
- Duct remnants are important for mcqs.
- Role of testosterone in gonadal differentiation.
- Development of inguinal canal.
- Relocation of testes (imp)
- Ectopic testes.
- Cryptorchidism.
- Hypospadias
- Epispadias
- Hydrocele.

### CNS Development:

Read the whole chapter from KLM for mcqs as they are unpredictable and clinicals from both KLM and Langman. Most Important topics from this section include:

- Development of spinal cord.
- Positional changes of spinal cord. (v.imp)
- Spina bifida and its types.
- Derivatives of alar and basal plates at each level.

- Development of pituitary gland. (v.imp)
- Give a read to all major clinicals.

Remember in your prayers,

Aimen Sami

Publications Representative, Batch 45.
